

Developer

Who are we?

Thousands of customers worldwide trust OutSystems, the number one low-code platform for rapid application development. Engineers with an obsessive attention to detail crafted every aspect of the OutSystems platform to help organizations build enterprise-grade apps and transform their business faster. OutSystems is the only solution that combines the power of low-code development with advanced mobile capabilities, enabling visual development of entire application portfolios that easily integrate with existing systems.

OutSystems is a global company, with a base in Lisbon, Portugal and international locations in Atlanta, London, Amsterdam, Dubai and Singapore. Our commitment to our culture is highlighted in [The Small Book of the Few Big Rules](#), written by our Founder and CEO, Paulo Rosado. This commitment to culture has made us a Forbes Best Cloud Computing Companies And CEOs To Work For In 2016.

Go and see for yourself what our [happy customers](#) have been saying about us.

What are we looking for?

OutSystems developers will work under the supervision of experienced OutSystems Service Delivery team to design, build and test collaborative applications that provide business solutions to our customers.

This role will master OutSystems Platform technology in conjunction with modern software engineering practices for developing web business applications in the context of agile projects.

Main Responsibilities:

- Develop solution features following OutSystems development best practices, ensuring solution performance and users adoption;
- Develop integrations with external systems according to the defined architecture guidelines;
- Finish all assigned tasks with quality within the defined timebox;
- Conducts unit testing and integration testing, executing the necessary bug fixing.

Competencies and Skills:

- Communication skills;
- Agile methodologies practices;
- Customer Orientation and Interpersonal Skills;
- Transparency and ability to establish trust and supportive relationships;
- Strong quality orientation and attention to detail;
- Ability to organize, estimate, and prioritize project tasks;
- Web application development and process design, and project delivery practices;
- Understanding of solution architecture and design, and web application performance.

**Requirements and Qualifications:**

- Proficiency with at least one programming language: PHP, C# or Java;
- Proficiency in web based languages: JavaScript, CSS, HTML;
- Knowledge in ASP.NET;
- Programming with databases: SQL Server, Oracle or MySQL;
- Knowledge in Database Modeling;
- Professional experience, 1 to 2 year, in web application programming is a plus;
- OutSystems development experience and certifications are a plus;
- Degree in Computer Science or Engineering. Academic achievements valued;
- Fluency in English, written and spoken (mandatory).

What we have to offer you?

Open office space, free yogurts and fresh fruit everyday, all the coffee you can drink, company parties as fun as a ride to Disneyland – yes, we got that covered. But, the more important things you can get from OutSystems are:

- A solid company that still keeps growing, changing and innovating, and giving teams room to be proactive and creative;
- Real career opportunities – we care about growth and development. Vertical career progression is an obvious possibility but we offer more than that: possibility of lateral moves, joining different teams, of mastering a specific skill;
- Work colleagues that are as smart, hardworking and driven as you – and spread all over the globe.

Are you ready for the next step in your career? Then we'd love to hear from you!
